AFFILIATE BRAND GUIDE

Logo Usage, Colors & Quick Reference

This is a quick reference for affiliates who want to represent Dynasty Futures correctly in their content. Use the approved logo, stick to the two brand colors, and you're good. For questions or to request logo files, email support@dynastyfuturesdyn.com.

1. LOGO

Two versions — use the horizontal logo for nearly everything. The monogram (DF mark only) is for profile pictures, avatars, and small square placements.

DARK STAGE

Thumbnails, banners, posts, video

Background: #0B1015

MONOGRAM

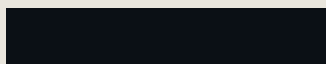

Profile pics, avatars, square placements

Use the DF mark only, no wordmark

Use whichever version fits your background best — dark on light, light on dark, or wherever it reads clearly. Just don't alter the logo itself.

2. BRAND COLORS

Just two colors to remember. Everything Dynasty Futures uses comes from these.

Dynasty Stage

#0B1015

Backgrounds, dark surfaces

Imperial Gold

#E0AE4A

Accents, CTAs, highlights

Ivory

#E9E6DD

Light mode backgrounds

Gold 600

#A1731F

Text on light backgrounds

Don't introduce other colors when representing Dynasty Futures. If you're making a thumbnail or graphic, stick to Stage + Gold on dark or Ivory + Gold 600 on light.

3. LOGO DO'S & DON'TS

DO:

Use the horizontal lockup for thumbnails, headers, banners, and most content

Use the monogram (DF mark) for profile pictures and small square placements

Give the logo some breathing room — don't crowd it with other elements

DON'T:

- ✗ Stretch, squash, rotate, or alter the logo proportions
- ✗ Recolor it, add shadows, glows, or any visual effects
- ✗ Recreate the logo or create your own version of it

4. GET THE LOGO FILES

Approved logo files are provided after you're accepted as an affiliate. If you need them or need a specific format, just reach out:
